

Satellite Video Platform

Seamlessly deliver
video content
without limits.

At du, we are bringing satellite services into the future to deliver a true end-to-end linear broadcasting solution: **Satellite Video Platform**. This state-of-the-art, fully managed platform contributes and distributes your TV and radio broadcast channels over satellite.

- **Direct-To-Home** – Deliver your content via the most popular DTH platforms including Nilesat, Arabsat, Hotbird, and other international systems.
- **Uplink** – Occasional and permanent uplink available across our entire uplink arc.
- **Downlink** – Dedicated downlink antennas for contribution, descrambling or low signal integrity issues.
- **Turnaround** – Choice of direct or delayed turnaround from satellite or fibre.

Benefits

- State-of-the-art teleport
- Strategic location
- Superior reliability
- Redundancy
- Maximum quality

Features

- **300+ TV channels and 25 DTH platforms** on main satellite platforms Nilesat, Arabsat and Eutelsat.
- **Tier III Certified Teleport program** by the World Teleport Association.
- Extensive antenna field with **30+ downlink and 40+ uplink steerable antennas**.
- Signal sources include **Playout, Turnaround, Fibre link, and SNG Truck**.
