Our responsibility is to express a conclusion on this condensed interim consolidated financial information based on our review.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed interim consolidated financial information is not prepared, in all material respects, in accordance with IAS 34.

This IFRS is effective for annual periods beginning on or after 1 January 2017 while earlier application is permitted. The core principle of IFRS 15 is that an entity recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The Company is yet to assess full impact of this new IFRS on its operations. It expects to apply this IFRS from 1 January 2017.

IFRS 9 requires all recognised financial assets that are within the scope of IAS 39 ‘Financial Instruments; Recognition and Measurement’ to be subsequently measured at amortised cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost at the end of subsequent accounting periods. All other debt investments and equity investments are measured at their fair values at the end of subsequent accounting periods.

The Company has in place an Executive Share Option Plan (“ESOP”) for selected senior managers to receive equity settled share options of the Company. The ESOP consisted of annual grant schemes, with the last grants in 2011.

Options in the ESOP vest upon completion of a defined service period, generally 3 years from the grant date, and expire on the earlier of their expiry date, generally 3 years from vesting or termination of the executives’ employment. There are no voting or dividend rights attached to the options. The exercise price is determined by taking the average of the daily closing share price of the 30 calendar days preceding the share scheme service period commencement date.

The fair value of services received in return for share options granted is measured by reference to the fair value of share options granted. The fair value of the options is calculated using the Black-Scholes option pricing model.
