Our responsibility is to express a conclusion on this condensed interim consolidated financial information based on our review.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed interim consolidated financial information is not prepared, in all material respects, in accordance with IAS 34.

Other matter

The consolidated financial statements of the Company as at and for the year 31 December 2013 and condensed interim consolidated financial statements for the quarter ended 31 March 2013 were audited and reviewed, respectively, by another auditor, whose reports dated 17 February 2014 and 01 May 2013, expressed an unqualified audit opinion and review conclusion, respectively.

The Company has in place an Executive Share Option Plan (“ESOP”) for selected senior managers to receive equity settled share options of the Company. The ESOP consisted of annual grant schemes, with the last grants in 2011.

Options in the ESOP vest upon completion of a defined service period, generally 3 years from the grant date, and expire on the earlier of their expiry date, generally 3 years from vesting or termination of the executives’ employment. There are no voting or dividend rights attached to the options. The exercise price is determined by taking the average of the daily closing share price of the 30 calendar days preceding the share scheme service period commencement date.

The fair value of services received in return for share options granted is measured by reference to the fair value of share options granted. The fair value of the options is calculated using the Black-Scholes option pricing model.
