

Guarantee

Guarantee: Blockchain enabled tracking & tracing

Solutions

Blockchain enabled Tracking & tracing

- Partial lockdown with health card based access.
- Automated & continuous route map creation for all people.
- High accuracy because of continuous tracking.
- Avoid exposures/infected people/hot zones.
- Built in self screening tools which notifies local health authorities in cases of high probability.

Benefits

Easily track primary , secondary contacts of infected cases with high accuracy and speed.

Immediate alert if a new case is identified through this application.

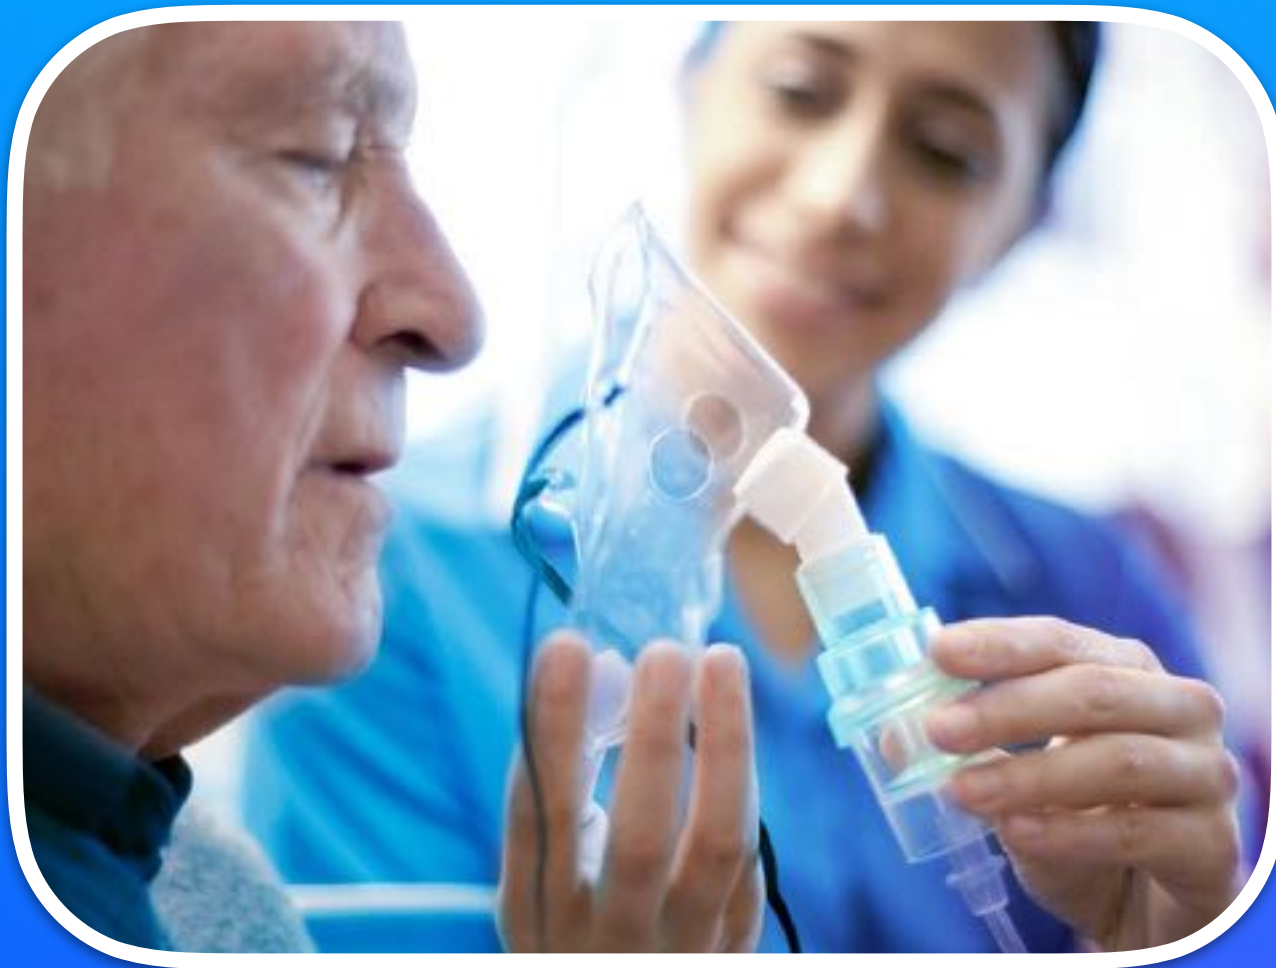

Track in real time the location of all self isolated cases and get immediate alerts if any violation occurs.

Enable economic activities safely by authenticating entry or movement of people using digital health record cards at any venue.

Guarantee: Forced / Self-quarantine

Forced quarantine monitoring.

- Physical tracks patient over his forced quarantine period.
- Leverages combination of indoor & outdoor tracking technologies in wearable & non-wearable devices.
- Detects if quarantined person has fainted or drop down.
- Alarm button can send instant notification to call center.

Self-quarantine monitoring.
