Digital Infrastructure

Business

du

Delivering an agile and flexible foundation for your digital transformation

du removes the complexity from connecting, managing and growing your digital infrastructure. Our experts in multi-cloud and hybrid cloud environments help you to develop and execute on your cloud strategy and maximise the value of digital transformation in your organisation.

We provide cloud management, data centre solutions, enhanced enterprise connectivity and Infrastructure as a Service that increases agility, reduces risk and simplifies a complex ICT ecosystem. You reduce your cost base while scaling up to serve new demand with a secure and consistent experience. We help you to migrate to cloud and manage your digital infrastructure with a purpose-built model designed to be seamless and secure. When you choose du, you gain world-class digital infrastructure delivered and managed by local experts.

Our Solutions

Infrastructure Services

Multi-Cloud
IaaS • DRaaS • BaaS
We provide Infrastructure as a Service (IaaS), Disaster Recovery as a Service (DRaaS) and Backup as a Service (BaaS) delivered across multi-cloud environments. You benefit from new resiliency and redundancy with solutions hosted in public and private clouds.

Data Centre Solutions

Data Centre Co-Location
In-Country Data Centres
du's five Tier III-certified data centres offer hyperconnected, secure and redundant digital hubs. Built in low risk environments with industry-leading physical security, du's data centres deliver trusted infrastructure that can be scaled up across Abu Dhabi and Dubai. Our carrier-neutral facilities offer dual access to local networks matched with international terrestrial and subsea cable connectivity.

Cloud Management

PaaS & SaaS
Cloud Migration • Multi-Cloud Management
Cloud Analytics and Optimisation
du's comprehensive tools and services simplify the migration, management and optimisation of your multi-cloud environments with a comprehensive managed service. Unified cloud management offers new visibility and optimisation while guaranteeing IT environments support the flow and analysis of data and security from the core to the edge.

Enterprise Connectivity

Managed Connectivity/Advance Networks
Cloud and Data Centre Connectivity
We provide high-performance data centre interconnection, cloud connectivity, managed connectivity and software-defined networks. Our flexible networking options ensure your applications and services are connected with efficiency and reliability. You benefit from direct cloud on-ramps as well as highly scalable on-demand bandwidth.

Migration, management and multi-cloud

Wherever your organisation is on its digital journey, we can help you find the best path forward. Our cloud migration services provide discovery, assessment, design and planning to ensure you have an efficient and optimised approach to the cloud. Our management services help you bridge the cloud talent gap and focus on your core business. Multi-cloud delivers a simple way to connect applications, services and data between clouds, wherever those clouds may be and whatever landing zone is required.

Migration services

- Discovery
- Assessment
- Design & Plan
- Migration with Hyper Care

Management services

- PaaS, SaaS and Containers
- Cloud Analytics and Optimisation
- Multi-Cloud Management
- Disaster Recovery and Business Continuity
- Database Management
- Database Optimisation & Analytics
- Middleware Management
- Patch Management & Monitoring

Multi-cloud

MS Azure	du Cloud	AWS	Google	IBM	Oracle	Private Cloud	Containers

Benefits

Simplify management
Remove the complexity of managing multiple vendors and manage your entire multi-cloud estate through a single unified user interface.

Consistent experience
Benefit from a seamless and consistent experience across all of your digital infrastructure, including hybrid environments.

Reliability and resiliency
Geographic redundancy in five sites across Dubai and Abu Dhabi and direct cloud on-ramps to world-leading cloud service providers, supporting 99.999% uptime.

Rapid scalability
Rapidly scale your digital infrastructure and cloud requirements to match demand.

New cost-efficiency
Optimise resources across your organisation while moving capex to opex and removing the need for resource-intensive investments in hardware.

Seamless connectivity
Connect data centres, clouds and enterprise locations with a high-performance networking purpose-built to support hybrid and multi-cloud environments.

Why choose du?

Deep cloud expertise and experience
Our team of experts can help to guide and support you from cloud migration to management and into multiple clouds. We're a safe pair of hands.

Work with world-class partners
In addition to our own data centre infrastructure, we're partners with world-leading cloud service providers and can offer insights and recommendations for choosing public clouds.

Focused on real-world outcomes
We take a low-risk, high-reward approach to digital transformation and are focused on your real-world outcomes, whether that's cost-savings, business agility or future-proofing your organisation in uncertain times.

Agile, flexible, local
We understand local regulatory and compliance requirements and enable organisations to host applications, services and data in the UAE. We understand what local success looks like.
