Digital Trust

Business

du

Create a trusted environment for your digital adoption

We provide cybersecurity solutions that enable your organisation to manage risk, take a proactive approach to security, and adopt digital solutions with confidence. Our world-leading cyber security solutions are managed by in-country cybersecurity defence centre to help you keep pace with the latest security technologies, compliance requirements and trends that impact enterprise security.

du helps you to adopt a cybersecurity posture that is continually evolving to protect your organisation in a rapidly changing threat landscape. When you choose du, you gain instant access to the expertise, technology and scale you need to protect your digital enterprise and accelerate growth.

Solutions

Predict

Response

Strategy, Compliance and Risk Management

du audits, assesses, prioritises and provides recommendations for managing risk and securing your ICT ecosystem. Our security experts report on threat vectors, associated risks and compliance issues, and uncover weaknesses in your organisation's current security posture. Based on this, we create strategic recommendations and offer your organisation risk management planning and execution
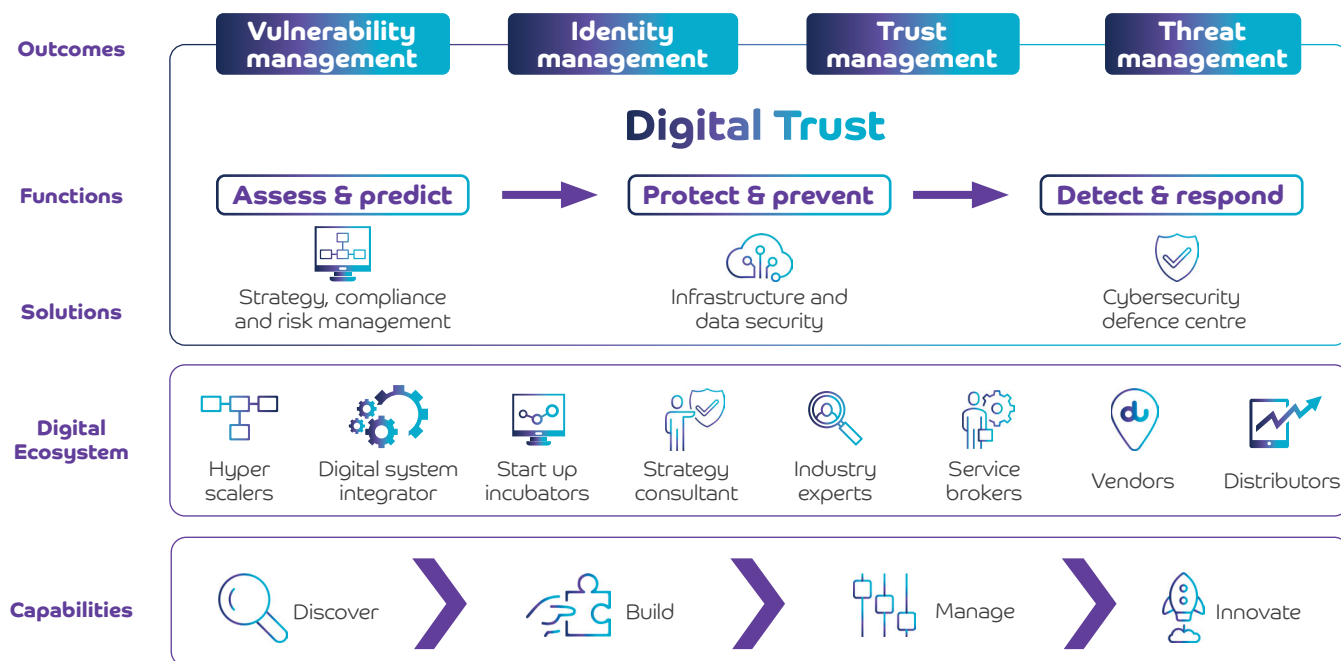

Infrastructure and Data Security

du implements multiple layers of defence to create holistic security solutions. Our security experts design, build and manage solutions covering network security, Workload security Applications Data Security and Access Management to reduce your attack surface. du offers 24x7 threat detection and response to ensure the integrity, availability and security of your applications and data hosted in your public, hybrid and private cloud infrastructure.

Cybersecurity Defence Centre

Located in the UAE, du's next generation cybersecurity defence centre and response services adapt, learn and evolve with new security threats that occur. Our security experts leverage state-of-the-art technologies and proven processes to continuously monitor, detect, analyse and respond to incidents across your ICT ecosystem. This reduces mean time to detect (MTTD) and mean time to respond (MTTR).

Outcomes	Vulnerability management	Identity management	Trust management	Threat management

Digital Trust

Functions	Assess & predict	→	Protect & prevent	→	Detect & respond

Solutions	Strategy, compliance and risk management	Infrastructure and data security	Cybersecurity defence centre
