

Managed WiFi

Seamless WiFi for growing businesses

WiFi should be easy to deploy and manage. Users of all kinds rely on connectivity, and organisations should be ready to deliver WiFi when and where it is needed.

du's Managed WiFi solution enables enterprises to seamlessly connect their users around the clock, with indoor and outdoor WiFi solutions that complement all types of devices. This solution is supported by end-to-end, 24/7 managed infrastructure with a fully tailored WiFi network. We eliminate the need for assigning resources by providing you with both on-site and off-site support enabling you to focus on your core business.

We offer you a comprehensive platform to seamlessly connect your users to WiFi, providing you with an increased advantage in a highly competitive market.

Benefits

• 24/7 control

Monitored and managed around the clock by our WiFi experts, we free up your resources. This will enable you to focus on your core business while trusting that your WiFi is in safe hands.

• Risk Management

Our industry leading security experts qualify, investigate, and mitigate threats to your network before they can impact your business.

• Secure Guest Access

When trying to access your public WiFi, users are directed to a secured login page where the information entered stays strictly confidential and inaccessible to others on the network.

• Optimised UX

With a customised login screen and default landing page, you can modify and manage your WiFi portal's look and feel according to your brand. This will enable your users to have a personalised experience on your public WiFi.

• Technical support

We provide you with on-site and off-site support and our WiFi experts can help with both your own and your users' questions or problems 24/7.

• A trusted service

Strict Service Level Agreements ensure that you receive the best possible service with clearly defined expectations and outcomes.

• Competitive advantage

With consumer expectations becoming more demanding of enterprises and technology, deploying our Managed WiFi solution provides you with a competitive edge increasing preference over competitors.

Features

- **Optional WiFi hotspots** typically include: High Speed Internet Access (HSIA) gateway, Access Points, Wireless LAN Controller, Network Switches, Cabling, Network Load Balancer (optional) and Professional services.
- Gain critical visibility into the users of your WiFi via our **intuitive dashboard** that provides you with **detailed analytics and reporting**. Information summarised and displayed varies from bandwidth consumption to access point statistics.
